

IN THE CLAIMS

Please amend the claims as follows:

1. (Currently Amended) A ceramic heater comprising:

a ceramic substrate <u>having a work-heating surface which is configured to directly face a</u>
work to be heated; and

a heating element disposed either on or in the ceramic the surface or internally of the substrate,

wherein the work-heating surface has a JIS B 0601 surface roughness of Rmax = 0.05 to 200 μ m.

2. (Currently Amended) A ceramic heater comprising:

a ceramic substrate <u>having a work-heating surface which is configured to directly face a</u> work to be heated; and

a heating element disposed either on or in the ceramic the surface or internally of the substrate,

wherein said ceramic substrate contains an element other than its dominant constituent elements and the work-heating surface of the heater has a JIS B 0601 surface roughness of Rmax = 0.2 to 200 μm .

- 3. (Previously Presented) The ceramic heater according to Claim 1 wherein said ceramic substrate is at least one member selected from the group consisting of a nitride ceramic, a carbide ceramic and an oxide ceramic.
 - 4. (Currently Amended) A ceramic heater comprising:

a nitride ceramic substrate <u>having a work-heating surface which is configured to</u>

<u>directly face a work to be heated;</u> and

a heating element <u>disposed</u> either on <u>or in the nitride ceramic</u> the surface or internally of said substrate,

wherein said nitride ceramic substrate contains an element other than its principal constituent elements and the work-heating surface of the heater has a JIS B 0601 surface roughness of Rmax = 0.2 to 200 μ m.

5. (Currently Amended) A ceramic heater comprising:

a nitride ceramic substrate <u>having a work-heating surface which is configured to</u>

<u>directly face a work to be heated;</u> and

a heating element <u>disposed</u> either on <u>or in the nitride ceramic</u> the surface or internally of said substrate,

wherein said nitride ceramic [[board]] <u>substrate</u> contains at least one element selected from Na, B, Y, Li, Rb and Ca and [[a]] <u>the</u> work-heating surface has a JIS B 0601 roughness value of Rmax = 0.2 to $200 \mu m$.

- 6. (Canceled)
- 7. (Previously Presented) The ceramic heater according to Claim 4
 wherein the content of at least one element selected from the group consisting of Y, Li,
 Rb and Ca is not less than 0.1 weight %.
- 8. (Previously Presented) The ceramic heater according to Claim 4wherein the content of at least one element selected from the group consisting of Na andB is not less than 0.05 ppm.
- 9. (Previously Presented) The ceramic heater according to Claim 2, wherein said ceramic substrate is at least one member selected from the group consisting of a nitride ceramic, a carbide ceramic and an oxide ceramic.
 - 10. (Canceled)
- 11. (Previously Presented) The ceramic heater according to Claim 5 wherein the content of at least one element selected from the group consisting of Y, Li, Rb and Ca is not less than 0.1 weight %.

12. (Previously Presented) The ceramic heater according to Claim 5

wherein the content of at least one element selected from the group consisting of Na and B is not less than 0.05 ppm.

- 13. (Previously Presented) The ceramic heater according to Claim 1, wherein a semiconductor wafer is heated while being held by a supporting pin at a distance of 1 to 5000 μ m apart from the work-heating surface of the ceramic heater.
- 14. (Previously Presented) The ceramic heater according to Claim 2, wherein a semiconductor wafer is heated while being held by a supporting pin at a distance of 1 to 5000 μ m apart from the work-heating surface of the ceramic heater.
- 15. (Previously Presented) The ceramic heater according to Claim 4, wherein a semiconductor wafer is heated while being held by a supporting pin at a distance of 1 to 5000 μ m apart from the work-heating surface of the ceramic heater.
- 16. (Previously Presented) The ceramic heater according to Claim 5, wherein a semiconductor wafer is heated while being held by a supporting pin at a distance of 1 to 5000 μ m apart from the work-heating surface of the ceramic heater.
- 17. (Previously Presented) The ceramic heater according to Claim 1, wherein thermal conductivity of said ceramic substrate is 130 to 200 W/m·K.
- 18. (Previously Presented) The ceramic heater according to Claim 2, wherein thermal conductivity of said ceramic substrate is 130 to 200 W/m·K.
- 19. (Previously Presented) The ceramic heater according to Claim 4, wherein thermal conductivity of said ceramic substrate is 130 to 200 W/m·K.
- 20. (Previously Presented) The ceramic heater according to Claim 5, wherein thermal conductivity of said ceramic substrate is 130 to 200 W/m·K.
- 21. (Previously Presented) The ceramic heater according to Claim 1, wherein a thickness of said ceramic substrate is 0.5 to 5 mm.

- 22. (Previously Presented) The ceramic heater according to Claim 2, wherein a thickness of said ceramic substrate is 0.5 to 5 mm.
- 23. (Previously Presented) The ceramic heater according to Claim 4, wherein a thickness of said ceramic substrate is 0.5 to 5 mm.
- 24. (Previously Presented) The ceramic heater according to Claim 5, wherein a thickness of said ceramic substrate is 0.5 to 5 mm.

25-26. (Canceled)

- 27. (Previously Presented) The ceramic heater according to Claim 1, wherein the ceramic heater is a heater for heating a semiconductor wafer.
- 28. (Previously Presented) The ceramic heater according to Claim 2, wherein the ceramic heater is a heater for heating a semiconductor wafer.
